

IBM i & AIX

Software Maintenance

Switching to third-party software maintenance for IBM i or AIX OS running on your IBM hardware ensures your equipment continues operating at peak performance without the high cost of OEM support. By unbundling your software and hardware maintenance, you connect to more flexibility and risk-free software support.

You can rely on expert IBM i and AIX OS support, including security updates, annual health checks and more. Service Express has over 25 years of experience in providing customers with user-friendly data center services.

Compare Your Software Maintenance Options for IBM i & AIX Support
